

Variable Rate Excess Flow Valve - Model 6022

Designed with an adjustable flow rate, this excess flow valve terminates flow in the event of a catastrophic leak such as a hose rupture, etc. Made in the USA

Features:

- Stainless steel construction
- Adjustable flow termination settings
- Excellent chemical compatibility and corrosion resistance
- Minimum number of parts for easy maintenance
- Effective in both low and high pressure systems

Specifications:

- Pressure: Up to 3000 psi
- Temperature: Up to 250°F
- Connections: 3/8" NPTF

Wetted Materials:

- Body: 300 Series stainless steel
- Seat: Teflon®
- Seals: EPR

Ordering Information:

Order Part Number 6022.
For a Repair Kit, order RK6022.

Applications:

Designed for the carpet/floor cleaning industry and applicable in any pressurized water system subject to catastrophic flows.
