

Chatter Resistant Check Valve – Model CV050F

The Model CV050F 1/2" chatter resistant check valve features a larger body and through port. The larger size ensures reduced velocity through the valve, minimizing the effects of corrosion. Made in the USA.

Features:

- Bubble tight shut off against reverse flow
- Designed to check flow in both low and high pressure systems
- Few components for efficient maintenance
- Chatter resistant
- May be mounted in any direction

Specifications:

- Pressure: Up to 2000 psi
- Temperature: Up to 200°F
- Dimensions: 4.1" length, 1.6" diameter
- Weight: 2 lb.
- Cracking Pressure: 5 psi max

Wetted Materials:

- Body: Brass or stainless steel
- Poppet: 300 Series stainless steel
- Spring: 302 Stainless steel
- Seals: EPR

Ordering Information:

Order part number CV050F for Brass body
Order part number CV050F-S for Stainless steel body
For a Repair Kit, order RKCVC050F

Applications:

Self service car and truck washes and automatic car and truck wash systems.
Industrial applications for either gas or fluid media.
